High Tide Exterior Cleaning Solutions Wins Pressure Cleaning Contract for St. Johns County Schools in 2009-2010

ST. AUGUSTINE BEACH, Fla. (May 2009) – St. Augustine, Fla., company High Tide Exterior Cleaning Solutions, Inc. (High Tide) has won a pressure cleaning contract for the St. Johns County School District for the 2009-2010 school year.

“We are thrilled that our company will provide pressure cleaning services to our local school district,” said David Styles, who owns High Tide with his wife Stephanie. “Winning this contract in such a competitive environment is validation of the quality work we do and the value we bring our clients.”

The St. Johns County School District named High Tide as one of three power washing companies accepted to pressure clean the 37 schools in the county. The contract is valid from May 2009 – May 2010.

Why Hire a Professional?

“Anyone can buy a portable pressure washer and get to work,” Styles said. “But without proper equipment and experience, you can easily damage your property -- or worse, someone else’s.”

Northeast Florida’s humid subtropical climate contributes to unsightly and potentially damaging conditions that often require professional expertise. Properly cleaning on a regular basis is the easiest way to maintain a facility’s appearance and value as well as avoid costly repairs and renovations.

In addition to mold, mildew and algae, these unsightly and potentially damaging conditions often require professional pressure cleaning as well:

- Rust stains caused by iron-rich well water
- Weather, soil erosion, grease and oil spills
- Oxidation and efflorescence

High Tide’s safe, gentle and effective cleaning process relies on appropriate use of heat, pressure and cleaning solutions. Our commercial grade cleaners are tough on dirt, pollutants, mold, mildew and algae yet safe for people, plants and animals. Our professionals have spent many hours learning the nuances of their equipment as well as in industry training. Our equipment has variable pressure and heat options not available on the low-end consumer machines that enable them to ensure a damage-free, quality cleaning.

About High Tide Exterior Cleaning Solutions, Inc.

High Tide Exterior Cleaning Solutions, Inc. specializes in restoring building exteriors to their original appearances. Based in St. Augustine Beach, Fla., the company serves the St. Augustine and surrounding St. Johns County communities. A family-owned, woman-owned company, High Tide provides outstanding pressure cleaning services and customer support for the commercial and residential markets. Founded by St. Augustine Beach residents David and Stephanie Styles, High Tide is a Florida Corporation properly licensed with St. Johns County and carrying \$1 million in liability insurance for the protection of its clients’ property.
